

# Snapshot of Indiana's P-16 Achievement Gaps

Indiana Commission for Higher Education  
December 2005

# Pre-K GAPS

# Pre-K

---

- It is estimated as many as 50% of children nationally are not fully prepared to succeed when they enter kindergarten.
- In Indiana, in any given year there are approximately 80,000 children per age group, and of these approximately 25% are at-risk due to poverty
- Indiana is one of only six states that does not provide funding for preschool.
- Several states have universal preschool available, notably Georgia and Oklahoma.
- Data show that pre-K education is nearly universal for children of well-educated parents in high incomes.

# Pre-K Benefits

---

- Increases high school graduation rates
- Helps children do better on standardized tests
- Reduces grade repetition
- Reduces the number of children placed in special education
- Reduces crime and delinquency
- Lowers rates of teen pregnancy
- Leads to greater employment and higher wages as adults
- Contributes to more stable families
- Saves taxpayers money (every \$1 invested in high-quality pre-K saves \$7 in K-12, social service and crime costs)

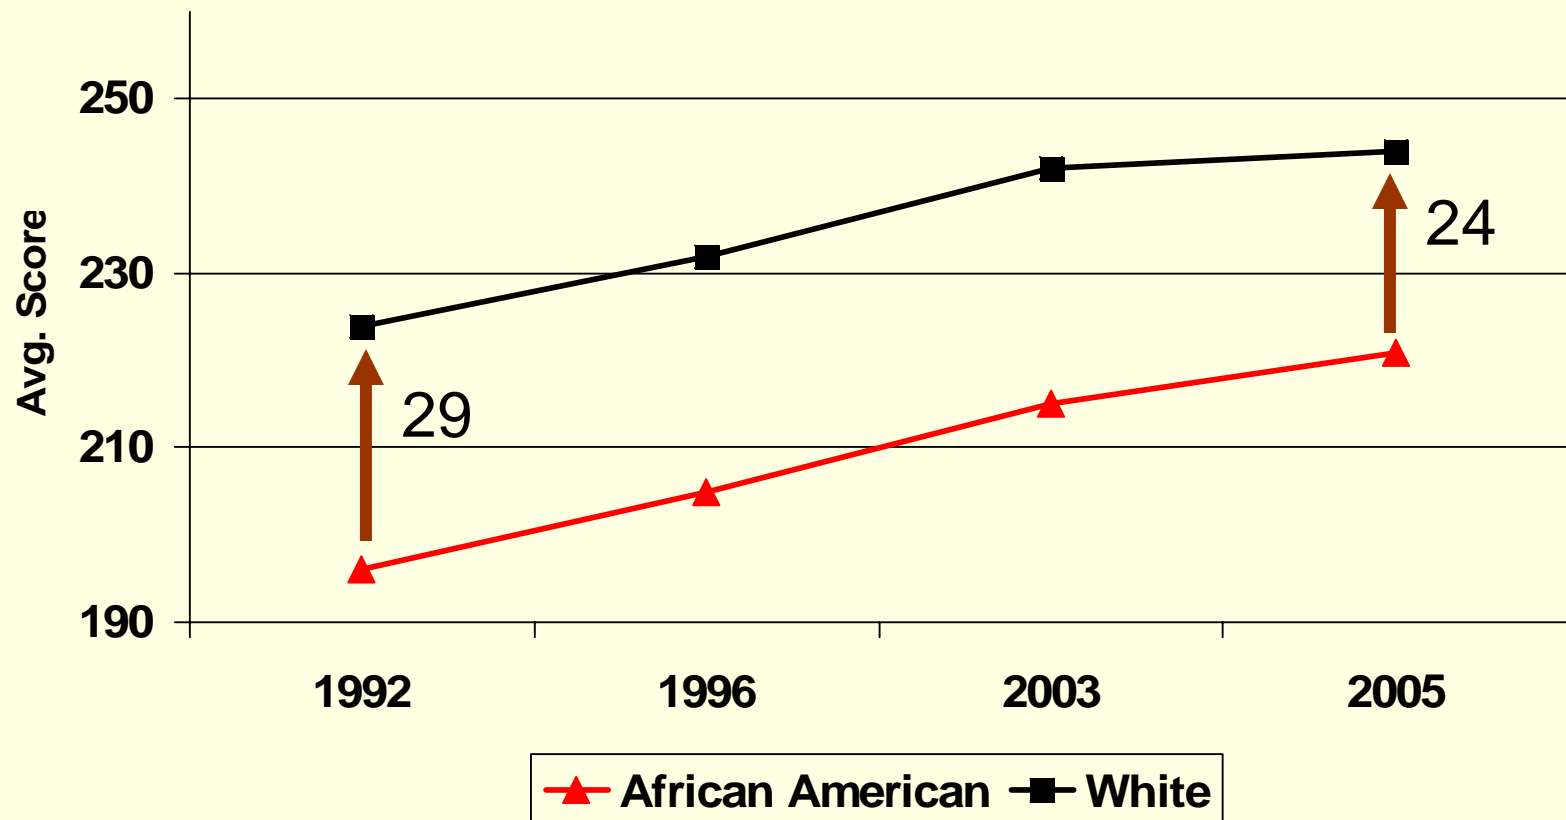

# K-12 GAPS

# NAEP: The Nation's Report Card

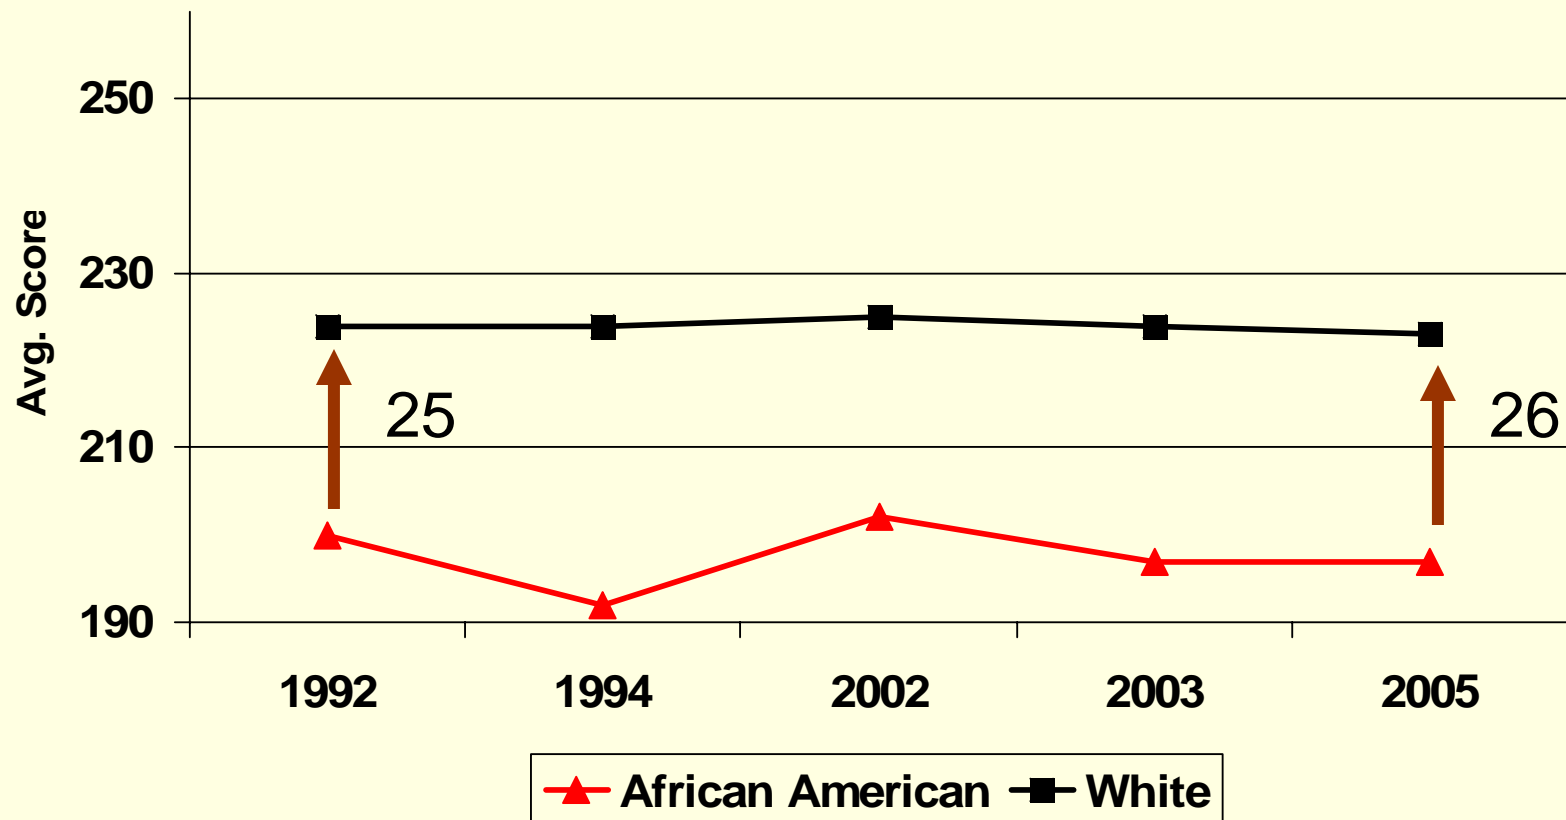

---

- While all states conduct annual standardized tests to report on the performance of students on their specific curriculum objectives, the state assessments vary substantially. Results among the states cannot be compared.
- The National Assessment of Education Progress (NAEP) produces a national set of scores based on the performance of students across the country and state-level results for participating states and jurisdictions.
- Policymakers, educators, and parents rely on national and state data from NAEP to help them understand how their state's performance compares to the national average and to that of other states, and to assess the extent to which the performance in their state is moving forward or falling behind.

# ISTEP+

---

- Indiana's K-12 academic standards in English/language arts, math, science, and social studies are ranked among the very best in the nation.
- The academic standards spell out what students are expected to know and be able to do as they advance through school.
- Using these standards, the Indiana Statewide Test of Educational Progress Plus (ISTEP+) measures student performance annually in grades 3-10 in reading, writing, math, and grades 5-7 in science (with social studies to be added when funding permits).

# Advanced Placement

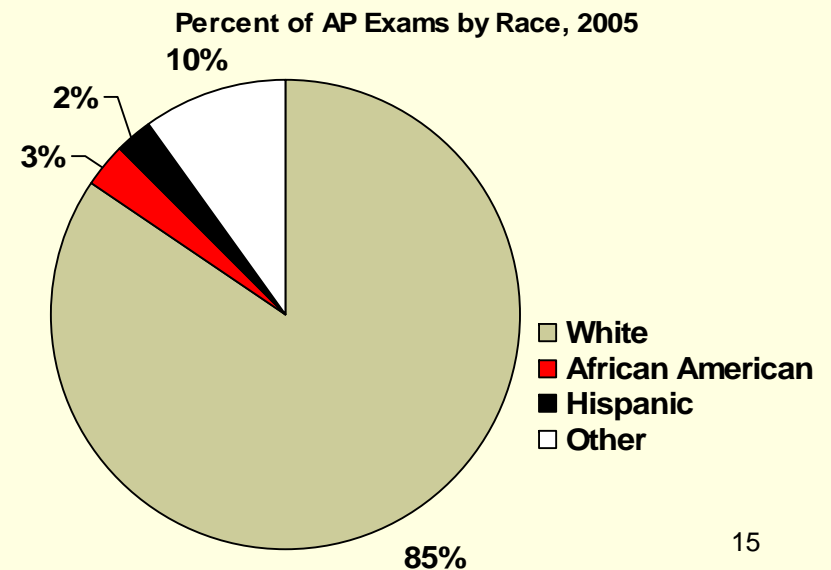

---

- The Advanced Placement (AP) program provides students with an opportunity to take college level courses in high school. The AP program offers 35 courses in 20 subject areas.
- AP courses count towards a student's high school diploma, and provide a student with an opportunity to get a "jump-start" on a college degree. Not only are AP tests often an indicator of a state's success with its best and brightest students, but they can also qualify students to receive college credit, depending on the scores.
- In 1990, the Indiana began requiring school corporations to provide AP mathematics and science courses. English language and literature were later added to this list.
- State appropriations support students taking AP exams in math, science, statistics, and English/composition. The State also funds summer professional development institutes for AP teachers.

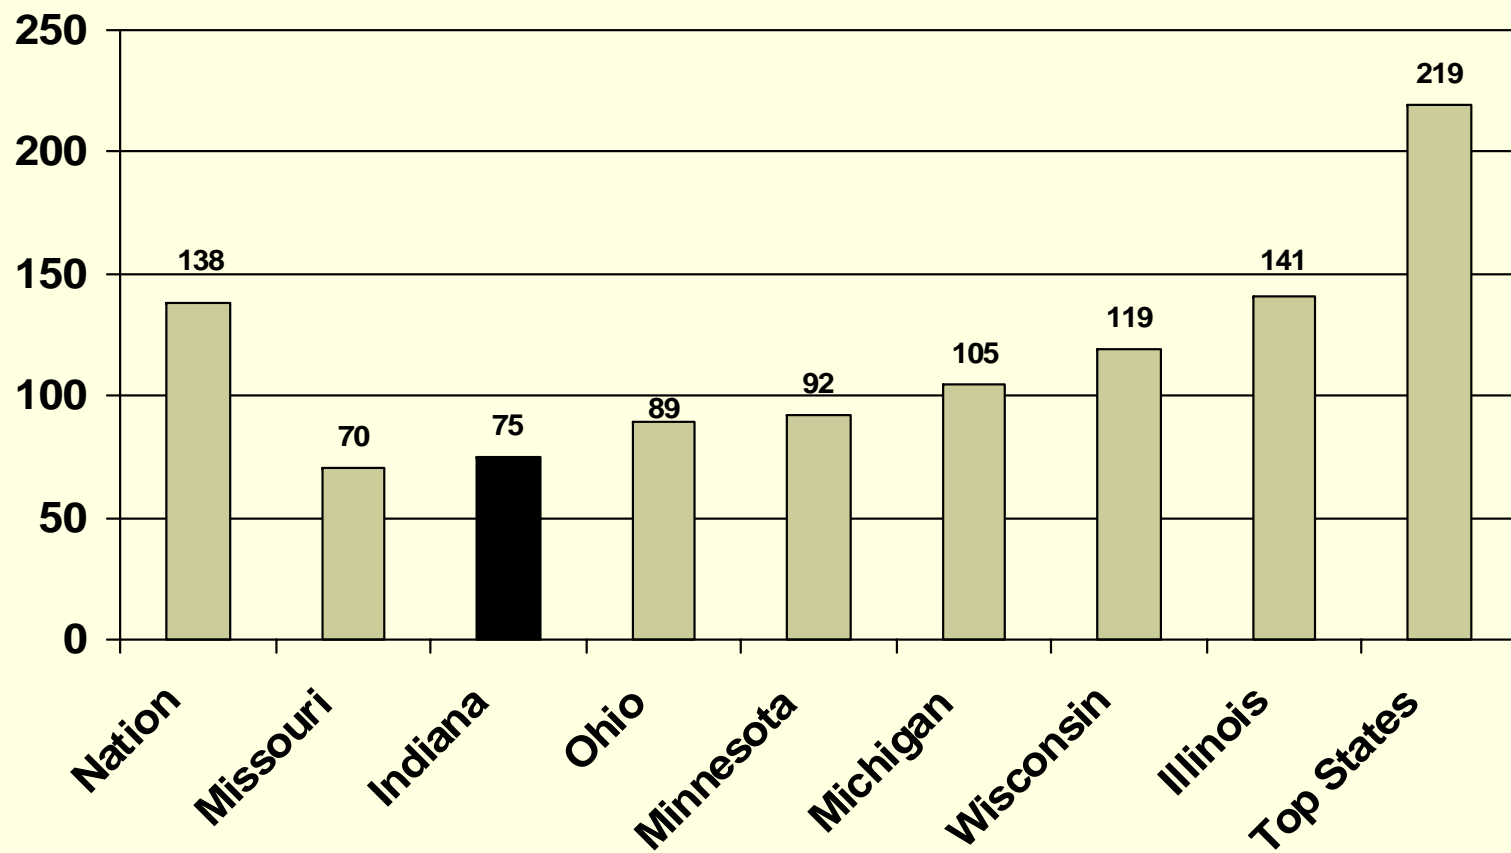

# Number of Indiana AP Exams Taken by Race

	2001	2002	2003	2004	2005
<b>African American</b>	514	509	655	779	926
<b>Hispanic</b>	372	348	448	508	657
<b>White</b>	13,926	15,244	17,496	19,718	24,307

	<b>Change from 2001 to 2005</b>	
	<b>Number</b>	<b>Percent</b>
<b>African American</b>	412	80%
<b>Hispanic</b>	285	77%
<b>White</b>	10,381	75%

## Percent of Indiana AP Exams with a Score of 3 or Higher by Race

# SAT

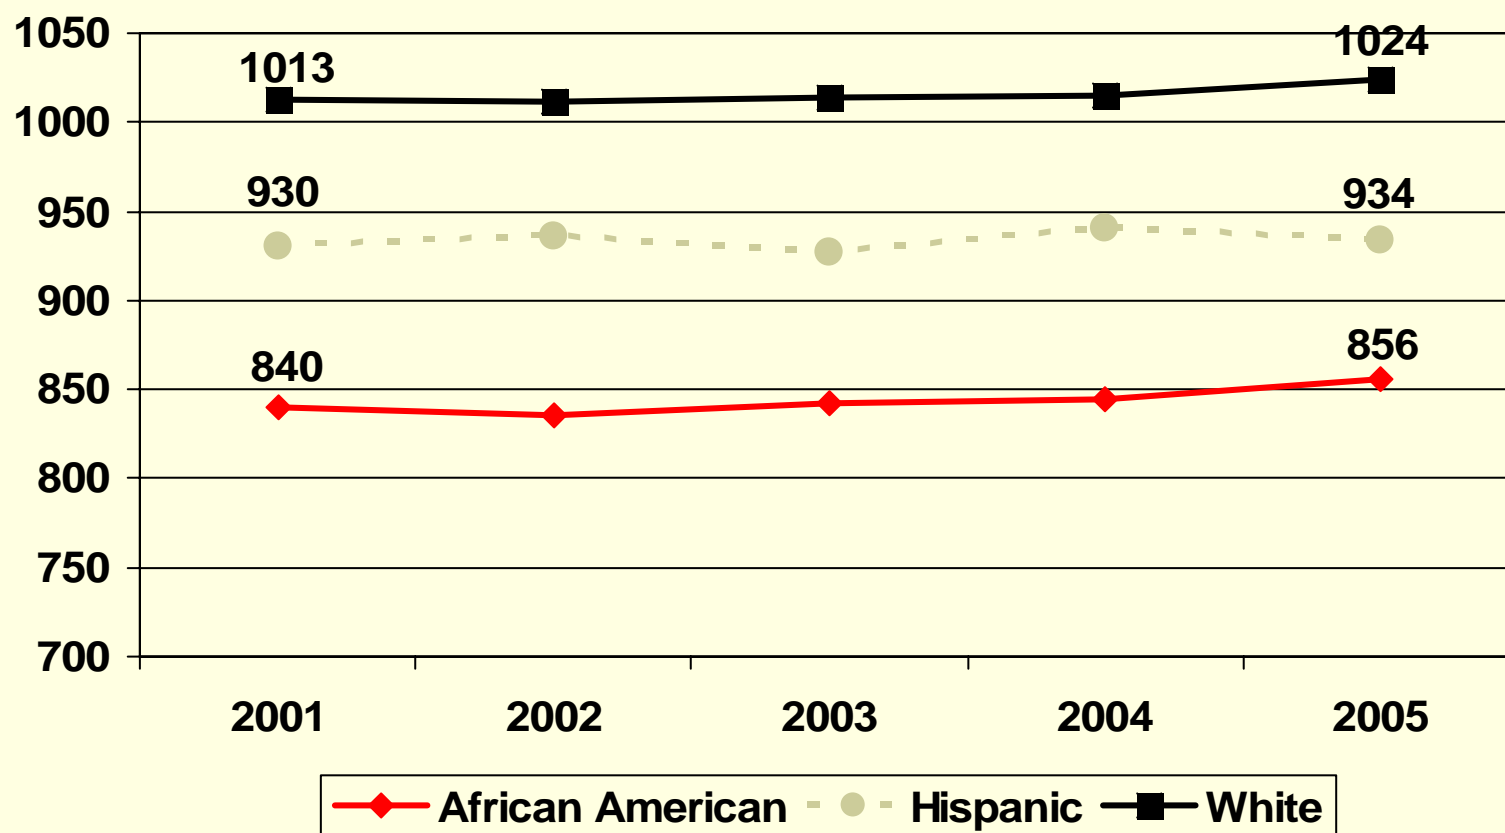

---

- Indiana high schools encourage students to take the SAT, which is evident in the state's participation rates.
- Approximately 62% of Indiana's seniors take the SAT each year, which is significantly higher than other surrounding states.
- Since the SAT is a college-bound admission test, a high percentage of student participation indicates an increasing number of Indiana students are considering college.

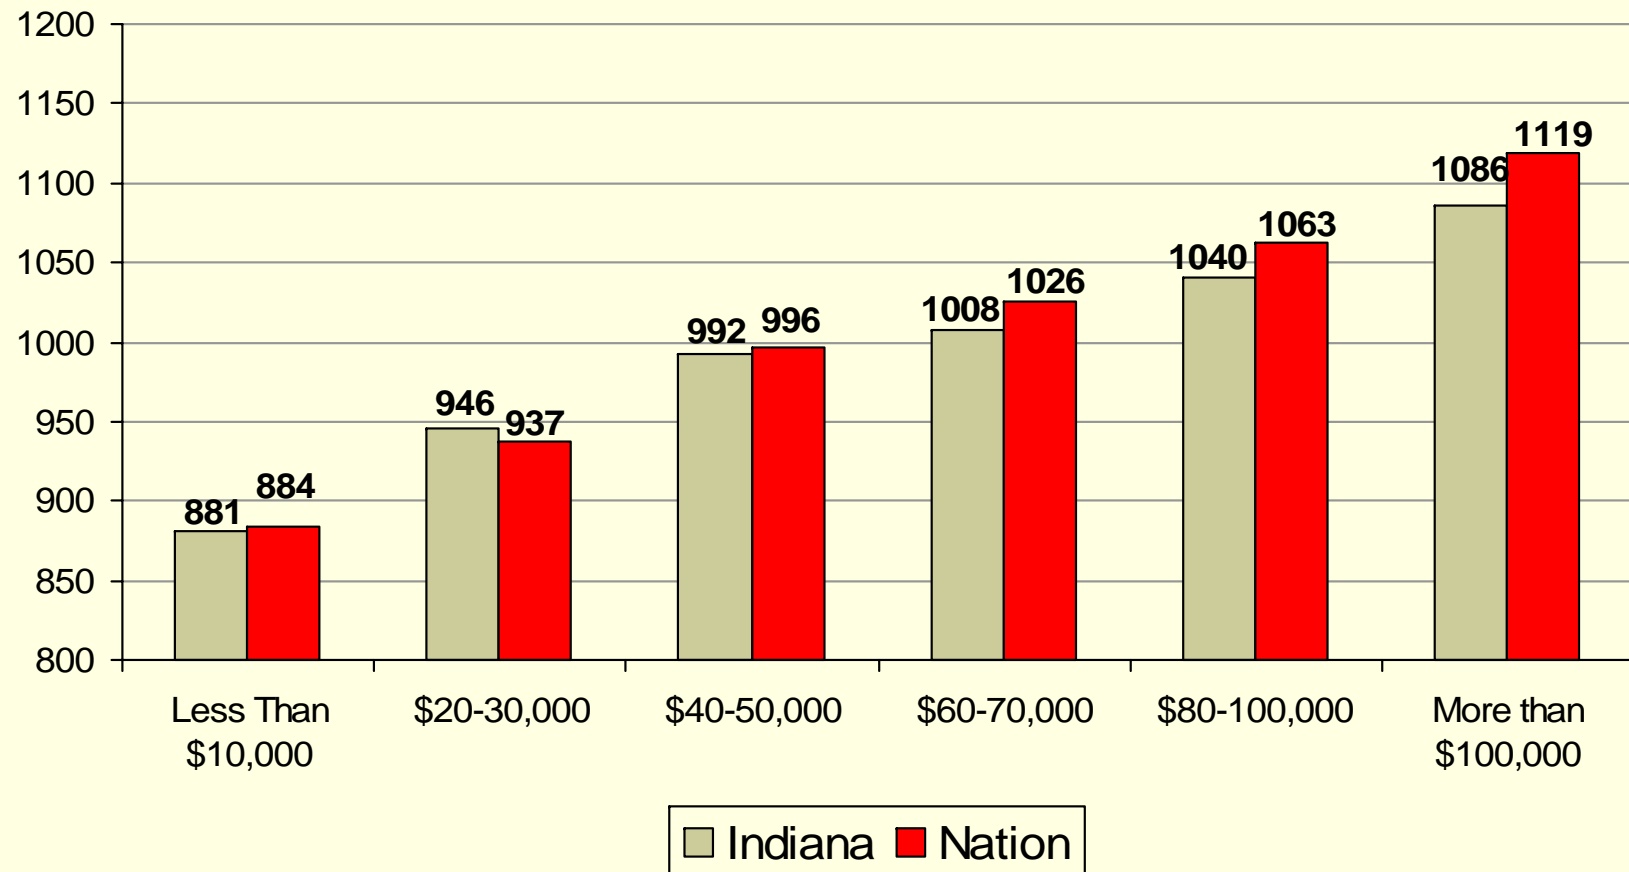

# Number and Percent of Indiana SAT-Tested High School Graduates by Race

	2001		2002		2003		2004		2005	
	N	%	N	%	N	%	N	%	N	%

# Eliminating Achievement Gaps

---

- Dispel myths about who can achieve and who can't
- Invest in early learning and school readiness
- Involve families as partners
- Provide additional assistance to schools
- Improve teacher quality and school leadership
- Ensure additional learning time
- Implement early interventions
- Provide incentives for schools to reduce dropouts
- Provide additional resources to schools with high numbers of limited English students
- Insist on rigorous academic expectations for all
